

## Mission 4: *Partner*

### Starting Objectives

#### **Main Goal:** *Stop the Train*

**Solution:** Make the train crash into the explosion's debris.

#### **Garrett:** *Find a way to the coal mine.*

**Solution:** Enter the mines near the miner's hut.

#### **Garrett:** *Find something useful in the mine that can help you stop the train.*

**Solution:** Find the map (tunnel destroying schema) showing where to place the explosive charges.

#### **Garrett:** *Barricade the railroad. Attention: after that your partner will have 5 minute left to complete her objectives.*

**Solution:** Set off the explosive devices with fire arrows.

#### **Garrett:** *See what happens next.*

**Solution:** Watch the train crash after after you have destroyed the tunnel and Victoria has completed all of her objectives.

#### **Victoria:** *Find a way to the train station.*

**Solution:** Enter the train station.

#### **Victoria:** *Get into the train and send the signal to your partner.*

**Solution:** On the train switch to Garrett and then back again to Victoria.

#### **Victoria:** *When the train starts moving, neutralize the train crew.*

**Solution:** Lob the gas mine into the engine cabin.

#### **Victoria:** *Break the locomotive wheel brakes.*

**Solution:** Use the wrench on the engine carriage's rear wheel brakes.

#### **Victoria:** *Leave the train. Attention: after that your partner will only have 1 minute to complete his objectives.*

**Solution:** Safely jump off the train once you have disabled the brakes.

### Hidden Objective

#### **Garrett:** *Set the explosive charge above the tunnel's arch, at the places shown in the schema.*

**Trigger:** Find the map (tunnel destroying schema) showing where to place the explosive charges.

**Solution:** Place the explosive devices above the railway track tunnel at the entrance to the mines. See below for screenshots.

### Note

You need to play as both Garrett and Victoria, you can switch to either player at any time using your 'Delegate Control to' device in your inventory.

### Garrett

*How do you turn off the safe alarm in the Directorate's office when playing on expert?*

Button under desk.

*I need more flares!*

There are 2 lanterns in the mines, level 2 & level 3

*Where's the key for level 4?*

Check the dead miner on the stairs.

*Where's the schema for showing where to place the explosives?*

The note in the ammunition store says the worker who was carrying the map died when he was taking some explosives to blow up the mines. He's the same dead miner you found on the stairs, this time look under the boulders from below him, ie from level 3.

*How do I get back up to the pathway to get to the top of the railway tunnel to place the explosives?*

There's a ladder in the offices corridor that takes you back to near where you started the mission.

*How do I set off the explosive devices?*

Fire arrows found in the secret room in the ammunition store.

*Now what?*

Now you need to switch to Victoria and get her onto the train, but you only have 5 minutes to do so before you fail the mission, so best to save before you destroy the tunnel, switch to Victoria and get her onto the train and then destroy the railway tunnel.

## Victoria

### How do I get into the train station?

First you need to get into the other side of the town. In the Mechanist area there's a lever in the guard tower that opens the gate. In the guards area you can jump across the minefield using the steps.

### I'm at the train station but there's a guard standing in front of the door.

Turn off the big fan.

### How do I get onto the platform?

One of the Mechanists by the gate in the lobby has a key.

### I'm on the train but I can't find anything to do?

Switch back to Garrett, then return to Victoria and the train will now be moving.

### How do I neutralize the train crew?

Use the screwdriver as a lockpick and lob in the gas mine.

### Where's the gas mine?

You mean you didn't find the secret back in the train station? Time for a reload I'm afraid.

### How do I break the locomotive's wheel brakes?

You need a wrench, on hard + expert it's on the roof of the engine carriage, on normal it's inside the engine carriage.

### How do I get onto the roof of the engine carriage?

Frob the button below the big lever in the engine carriage.

### How do I disable the brakes?

Climb down the steps of the side of the engine carriage and lean to reach the rear brakes. See screenshot below.

### How do I leave the train? If I jump I die.

Find the bedroll and hold it whilst jumping.

## Garrett

Once Victoria has disabled the brakes and/or has jumped off the train, now is the time to destroy the railway tunnel, return to Victoria if need be.

Location		Position	Loot	Value	Total	
Mine Entrance	miners hut	west footlocker	gold stack	25	25	
Level 1	director's office	safe	gemstone	125	150

				<b>Total Loot</b>	<b>1500</b>	

### Garrett Keys and other Important Items

Metal grey key	In hand of dead miner by rockfall on stairs, accessed via levels 1 + 2 only.
Explosive Charges	On shelves in ammunition store, level 4.
Fire Arrows	In secret area in ammunition store.

### Victoria Keys and other Important Items

Metal grey key	On Mechanist on other side of gate inside the train station.
Screw Driver	In toolbox, walkway on right hand side of engine carriage.
Bedroll	By crate beside ladder in cargo carriage once the train is moving.
Wrench	expert On top of engine carriage by search light
"	hard On top of engine carriage by funnel
"	normal Window ledge inside engine carriage.

### Secrets

Access the hidden weapons store in the ammunition room, level 4. Frob button under desk
Gas mine on bookcase in locked room in train station. Accessed via vent under train platform.
Lump of cheese on crate at other end of cargo carriage from the ladder. Only available once the train is moving.
